What is Google Colab ?

ECIDA Meeting

Chriss Santi

Colab is a shareable jupyter notebook

- Write Run and Share your code
- Save it on Github
- Use Google resources (free) or any other machine
- Acces millions of resources online and import them directly to colab

Demo with Tensorflow

Neural Network Classifier for breast cancer

- 600 entries
- Tensorflow and Keras
- aws

How to set up ? (it's here)
